OUR STORY Naeen Tile Industries Company was established in 1379 on a land with an area of 422,000 square meters in the 3rd kilometer of Nayin Road, Isfahan. This company has about 52,000 square meters of covered space. In Nain tile production lines, the best Italian machines with modern technology are used.

Currently, Kashi Nayin, with more than 15 years of experience in the field of producing all kinds of wall and floor ceramic tiles with the best quality and unique designs, continues to expand its activity in the field of industry and development of dear Iran.

شرکت صنایع کاشی ناین در سال ۱۳۷۹ و در زمینی به مساحت ۴۲۲،۰۰۰ متر مربع در کیلومتر ۳ جاده ناین اصفهان احداث گردید. این شرکت دارای حدود ۵۲،۰۰۰ متر مربع فضای سر پوشیده می باشد. در خطوط تولید کاشی ناین از بهترین ماشین آلات ایتالیایی با تکنولوژی روز استفاده شده است.

در حال حاضر کاشی ناین با بیش از ۱۵ سال سابقه در زمینه تولید انواع کاشی های سرامیکی دیوار و کف با بهترین کیفیت و طرح های منحصر بفرد به گسترش فعالیت خود در عرصه صنعت و توسعه ایران عزیز ادامه می دهد.

OUR STORY

The nominal production capacity of the factory is about 6 million square meters per year. Kashi Nain's products include the following items, which are offered to domestic and foreign customers in various designs and sizes: porcelain tiles (white body) with a variety of matte, glossy and polished glazes, decorative and luxury tiles, resistant tiles Against acid with industrial applications.

All these products are produced in accordance with the ISO 13006 international standard and are suitable for installation in all indoor and outdoor spaces with residential, commercial and industrial use. Currently, Nayin Tile Industry Company has exported some of its products to European, Asian, African and Latin American countries, and has active representatives in all provinces of the country.

ظرفیت اسمی تولید کارخانه حدود ۶ میلیون متر مربع در سال می باشد. محصولات کاشی ناین شامل موارد ذیل بوده که در طرح ها و اندازه های بسیار متنوع به مشتریان داخلی و خارجی عرضه می گردد: کاشی های پرسلانی (بدنه سفید) با انواع لعاب های مات، براق و پولیش خورده کاشی های دکوراتیو و لوکس کاشی های مقاوم در برابر اسید با کاربرد های صنعتی.

کلیه این محصولات مطابق با استاندارد بین المللی Iso 13006 تولید شده و برای نصب در کلیه فضاهای سرپوشیده و سر باز با کاربری مسکونی، تجاری و صنعتی مناسب می باشد. در حال حاضر شرکت صنایع کاشی ناین بخشی از محصولات خود را به کشورهای اروپایی، آسیایی، آفریقایی و آمریکای لاتین صادر نموده، همچنین در تمامی استان های کشور نماینده فعال دارد.

CERAMIC

One of the most widely used materials used in construction is ceramic tiles. In general, one of the positive features of ceramics is its resistance to freezing and fire resistance, and it does not change shape against fire, does not change color over time, and is resistant to sunlight.

یکی از پرکاربردترین مصالحی که در ساختمان سازی از آن استفاده می شود، کاشی و سرامیک است. به طور کلی از ویژگی های مثبت سرامیک، مقاومت در برابر یخ زدگی و ضد حریق بودن آن است و اینکه در برابر آتش تغییر شکل نمی دهد، با گذشت زمان تغییر رنگ نمی دهد و در برابر اشعه خورشید هم مقاوم می باشد.

ABOUT US

Marabu Ceramics is a newly established brand in the field of porcelain ceramics production, which operates in five branches in the two main poles of selling tiles and ceramics in Tehran; Bani Hashem Street and Shiraz Street has started.

Our brand, with its multiple goals, is trying to provide beauty and quality along with authenticity and art according to all tastes to our customers.

Every space reflects the identity of those who first imagine it and then create it. Therefore, our team, which consists of creative and experienced professionals in all stages of design, production and supply of goods to our customers, is always trying. Considering the speed of changes in today's modern world, which is the result of the emergence of different tastes among people, to provide the most beautiful and quality products and also to have a long-term vision for all our products. Among these perspectives, we can mention sustainable development and environmental standards as a result, in fact, our brand products, along with other international standards, have the environmental management system certificate (ISO 14001), which is the most well-known standard in the world for They show the commitment of an organization to environmental management.

Marabu Ceramics is ready to provide its services to customers with the aim of sustainability and customer-oriented approach.

درباره ما

مارابو سرامیک برندی تازه تأسیس در حوزه تولید سرامیک های پرسیلانی است که فعالیت خود را در پنج شعبه در دو قطب اصلی فروش کاشی و سرامیک تهران؛ خیابان بنی هاشم و خیابان شیراز، آغاز کرده است.

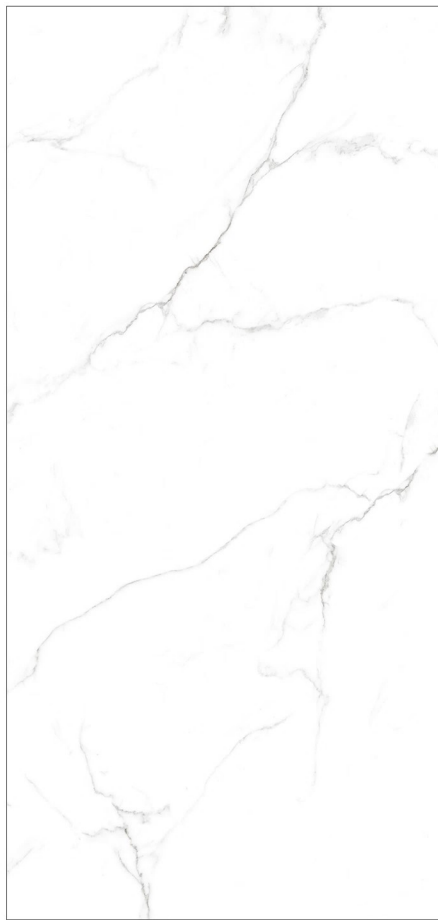

برند ما با اهداف چندگانه ی خود در تلاش است تا زیبایی و کیفیت را در کنار اصالت و هنر مطابق با تمامی سلیق به مشتریان خود ارائه دهد .

هر فضایی منعکس کننده هویت کسانی است که ابتدا آن را تصور و سپس خلق می کنند. از این رو تیم ما که متشکل از متخصصان خلاق و با تجربه در تمامی مراحل طراحی، تولید و عرضه ی کالا به مشتریان خود می باشد، همواره در تلاش است با در نظر گرفتن سرعت تغییرات در دنیای مدرن امروزی که نتیجه آن بوجود آمدن سلیق مختلف در میان مردم است، زیباترین و با کیفیت ترین محصولات را ارائه دهند و همینطور چشم اندازی طولانی مدت برای تمامی محصولاتمان داشته باشند. از جمله ی این چشم اندازها می توان به توسعه پایدار و در نتیجه استانداردهای زیست محیطی اشاره کرد که در واقع محصولات برند ما در کنار دیگر استانداردهای بین المللی خود، گواهینامه سیستم مدیریت زیست محیطی (ISO 14001) که شناخته شده ترین استاندارد حال حاضر دنیا برای نشان دادن تعهد یک سازمان به مدیریت زیست محیطی است .

مارابو سرامیک با هدف پایداری و رویکرد مشتری محور، آماده ی ارائه ی خدمات خود به مشتریان است .

ORLANDO

This design is inspired by Calcutta stone, which is one of the popular Italian marble stones. Combining the white background of this design with gray streaks evokes a space with a very luxurious and special appearance. The opaqueness of this ceramic inspires the viewer with a combination of two different styles, classic and modern.

MARABU

CERAMIC

Guide

Porcelain is one of the types of ceramics, in the process of its production, minerals are mixed with glass compounds, then it is baked under very high pressure and temperature, for this reason, porcelain is much more compact, thinner, and more resistant to water penetration. (water absorption less than 0.5 percent) and other materials; They also have more strength than other ceramic and tile textiles.

In building construction, they take advantage of this property of porcelain and use them as floor or wall covering in high traffic environments or building facades.

Roto printing or rotocolor is one of the methods of printing a design on a tile, which is newer than the flat or flat printing method, and in this method, the desired design and color are defined on special cylinders, then the design is transferred to the tile biscuit by means of fine cuts on the surface of the cylinders.

For some designs, the cylinder may move several times on the tile until the desired pattern is completely transferred, then an oil that acts as a fixer is poured on it and baked in the oven so that our desired design is completely fixed on the tile.

At the end of the tile production process, a layer of liquid compounds containing glass is poured on the tile and it is taken into the furnace, which is called tile glaze. In fact, tile glaze fills the pores on the surface of the tile and can vary from matte, semi-glossy to glossy.

The matte glaze of the tile is dull and lacks luster and does not reflect light, but on the other hand, it does not easily expose surface contamination.

As its name suggests, the glossy glaze of the tile is very shiny and transparent and reflects light, which makes the space look more spacious. Another advantage of glossy tiles is that they are easier to clean than other surfaces, but they easily expose any dirt on the surface of the tile.

Types of tile products that are used as floor coverings, this mark is included on them.

Ceramic has several different faces.

The thickness of the ceramic is 12.2 mm.

Ceramic is between the desired temperature.

Ceramics have completely smooth edges that can be used without tying.

Productin is an endless competition
