CERAMIC

One of the most widely used materials used in construction is ceramic tiles. In general, one of the positive features of ceramics is its resistance to freezing and fire resistance, and it does not change shape against fire, does not change color over time, and is resistant to sunlight.

یکی از پرکاربردترین مصالحی که در ساختمان سازی از آن استفاده می شود، کاشی و سرامیک است. به طور کلی از ویژگی های مثبت سرامیک، مقاومت در برابر یخ زدگی و ضد حریق بودن آن است و اینکه در برابر آتش تغییر شکل نمی دهد، با گذشت زمان تغییر رنگ نمی دهد و در برابر اشعه خورشید هم مقاوم می باشد.

PARADISE

Paradise marble is a beautiful contrast of black and white colors. This special stone has a bright white background with colorful black veins and wavy gray veins. The thick and thin black lines of paradise stone distinguish it from other white stones, which creates stunning beauty and perfection in the space. As the name of this stone suggests, its black veins and white background are the same color pattern seen on the body of the paradise.

TILBURGE

Tilburg is one of the marbles with a unique gray background and a busy theme, in which the white veins of spider webs are intertwined and scattered on the entire surface of the stone, which doubles its beauty. Inside this marble, white silk-like lines are scattered irregularly and patterned, which made this stone to be placed in the category of the most special and beautiful marble stones.

VITORIA

We are all influenced by our environment.

But what has a great impact on our mood in an environment is color. One of the main colors with a beautiful history in interior decoration is blue.

Using Vittoria ceramics can create relaxation and beauty in your home. The blue veins of this ceramic are inspired by South Oceania.

PORTIMO

In the interior decoration of the house, one of the latest designs for flooring is the use of parquet and wood design ceramics, which today has found many uses in residential places and other places such as offices. Parquet design ceramics are ceramics that have a very close resemblance to wooden floors, which is difficult to distinguish even for professionals at first glance.
